

AUGUST TRAINING SERIES

WARSAW, INDIANA

WITH WARSAW-WAYNE FIRE TERRITORY

AUGUST 4 - 16, 2021

WHAT YOU NEED TO KNOW

OBJECTIVE • Candidates successfully completing this training series certify in: Dry Suit Diving, Dive Rescue 1, Boat Based Operations, Critical Skills Diver, and Current Diving.

Five courses, offered in succession, allow candidates to complete prerequisites for potential future trainer classes.

Each training course may also be attended individually.

JUSTIFICATION • These credentials convey the core principles and skills for a fully operational dive rescue team. Dry Suit Diving training prepares divers to use dry suits addressing NFPA-suggested standards. Successful completion of the Dive Rescue I program provides basic methods and skills necessary for a Public Safety Diver to function safely and effectively at a water accident. Boat Based Operations is customized to ensure that students receive training specific to their particular vessels and accessories. Current Diving instructs team members about the intersection of swiftwater and dive rescue equipment and techniques.

CERTIFICATIONS, DURATION, & TUITION

Dry Suit Diving:

August 4-5, 2021- \$300.00

Dive Rescue I:

August 6-8, 2021 - \$375.00

Boat Based Operations:

August 9-11, 2021 - \$385.00

Current Diving:

August 12-14, 2021 - \$420.00

Critical Skills Diver:

August 15-16, 2021 - \$365.00

RECOMMENDED FOR • Agency Training Officers and others wanting to extend their skills and training.

AIRPORT

Fort Wayne International (FWA)

1-Hour Drive Time

ACCOMMODATIONS

Holiday Inn Express & Suites

300 Prosperity Dr.

Warsaw, IN 46582

(574) 549 - 9400

LOCATION OF CLASSROOM

Shrine Building at Kosciusko
County Fairgrounds

1400 E Smith St.

Warsaw, IN 46580

CLASS BEGINS AT 8:00 a.m.

D I V E R E S C U E I N T E R N A T I O N A L

AUGUST TRAINING SERIES

DRY SUIT DIVING prepares divers to use dry suits addressing NFPA-suggested standards. Without the proper protection from your potentially hazardous diving environment, your rescue/recovery operation may be hindered or, even worse, halted. One of the first steps to preparing for contaminated water or ice diving is learning how to dive in a drysuit. This program is conducted in a classroom, pool, and an open-water site to allow students to practice their new skills in a controlled environment before the field scenarios.

TOPICS INCLUDE Dry Suit History • Types of Dry Suits • Dry Suit Accessories • Proper Sizing and Custom Adjustments • Emergency Procedures • Repairs, Care, and Maintenance

PREREQUISITES All students must be a member of a public safety agency and at least 18 years of age. Students must also read and complete a RSTC Medical Statement prior to attending class. **Any diving answer yes to any contraindication must have the form signed by a physician.** All diving personnel must provide proof of openwater certification. This program is designed for personnel who are physically fit. Participants are encouraged to participate after successfully completing the IADRS Watermanship Test or testing to a fitness level of 13 MET (Metabolic Equivalents) or greater. Participants with aerobic fitness questions or concerns should consult their physician prior to in-water training.

BE SURE TO BRING US Coast Guard-approved PFD with knife and whistle, adequate clothing and protection from the environment (students are responsible for providing their own dry suit), and pen and paper for note-taking and sketching. Diving students must provide their own equipment: scuba regulator: recently serviced and environmentally protected with alternate air source (i.e.: octopus, Air II, etc.), timing device, depth and submersible pressure gauge, BC with oral/power inflator, two tanks with current Hydro & VIP, mask, snorkel, fins, weight belt, and two cutting tools (knife, wire cutters, or trauma shears).

DIVE RESCUE I is the internationally renowned three day (24 hour) training program for certified divers and surface support personnel. Successful completion of the Dive Rescue I program provides basic methods and skills necessary for a Public Safety Diver to function safely and effectively at a water accident. From scene evaluation to incident debriefing, this program covers it all. Diving and surface support personnel learn to apply the latest techniques in underwater rescue and recovery to prepare them to respond effectively and safely to water incidents. This program is presented in classroom, pool, and in open-water to allow students to become familiar with the techniques prior to field scenarios. Successful completion of this program is measured in class participation (including 2 dives) and an end of program comprehensive test.

TOPICS INCLUDE Drowning and PSD fatalities • Team organization and management • Search patterns • Scene evaluation • Victim retrieval • Service to the family, media, and other agencies • Vehicle in-water accidents

PREREQUISITES All students must be a member of a public safety agency and at least 18 years of age. Students must read and complete a RSTC medical statement prior to attending class. **Any diver answering yes to any contraindication must have the medical statement signed by a physician.** Diving students must have proof of open water certification. This program is designed for personnel who are physically fit. Participants are encouraged to participate after successfully completing the IADRS Watermanship Test or testing to a fitness level of 13 MET (Metabolic Equivalents) or greater. Participants with aerobic fitness questions or concerns should consult their physician prior to in-water training.

BE SURE TO BRING All students must bring: Pen and paper for note-taking and sketching. Diving students must provide their own equipment: Exposure suit adequate for swimming pool environment, scuba regulator: recently serviced and environmentally protected with alternate air source (i.e.: octopus, Air III, etc.), timing device, depth and submersible pressure gauges, BC with oral/power inflator, two tanks with current Hydro & VIP, mask, snorkel, fins, weight system and two cutting tools (knife, wire cutters, or trauma shears) swim suit, exposure suit, and goggles.

Boat Based Operations is Dive Rescue International's three-day diver preparedness class for public safety personnel. Students learn how to safely operate department watercraft for diving, water rescue, and search operations. We customize this program to ensure students acquire knowledge of the specific watercraft and equipment used by your department during operations.

TOPICS INCLUDE Overview of Common Watercraft for Public Safety Diving • Watercraft Maintenance and Basic Operations • Accessory Equipment • Principles of Anchoring and Launching • Diver Deployment and Recovery • Victim Recovery • Incident Command for Boat Based Diving and Search Operations

PREREQUISITES All students must be a member of a public safety agency and at least 18 years of age. Students must also read and complete a RSTC Medical Statement prior to attending class. **Any diving answer yes to any contraindication must have the form signed by a physician.** All diving personnel must provide proof of Dive Rescue 1 certification. This program is designed for personnel who are physically fit. Participants are encouraged to participate after successfully completing the IADRS Watermanship Test or testing to a fitness level of 13 MET (Metabolic Equivalents) or greater. Participants with aerobic fitness questions or concerns should consult their physician prior to in-water training.

BE SURE TO BRING Pen and paper. Diving students must provide their own equipment: Exposure suit; scuba regulator: recently serviced and environmentally protected with alternate air source (i.e.: octopus, Air III, etc.); timing device; depth and submersible pressure gauges; BC with oral/power inflator; two tanks with current Hydro & VIP; mask; fins; weight system and two cutting tools (knife, wire cutters, or trauma shears).

CRITICAL SKILLS DIVER training is Dive Rescue International's newest two-day diver preparedness class. Public safety diving often occurs in zero (or close to zero) visibility with multiple, unknown entanglement hazards. Through the CSD training course students learn the processes, causes, signs, and symptoms stressors apply to divers. Stress can lead divers down a path ending in panic - which always requires outside intervention. CSD training identifies this pathway and helps students to prevent the onset of panic. Students establish a baseline set of skills, learn the stress to panic pathway, and gain knowledge supporting the value of repetition in training. Students achieve muscle memory, stress survival responses, and become inoculated against stressors associated with public safety diving. Participants greatly improve their competency and comfort in the water.

TOPICS INCLUDE Scuba fatalities • Stressors, diver stress, diver response • Panic, diver panic, diver response • Management, prevention, and inoculation of stress • Physiological and psychological rigor • Entanglement protocol • Out of air emergency protocol • Problem solving underwater

PREREQUISITES All students must be a member of a public safety agency and at least 18 years of age. Students must read and complete a RSTC medical statement prior to attending class. **Any diver answering yes to any contraindication must have the medical statement signed by a physician.** Diving students must have proof of open water certification. This program is designed for personnel who are physically fit. Participants are encouraged to participate after successfully completing the IADRS Watermanship Test or testing to a fitness level of 13 MET (Metabolic Equivalents) or greater. Participants with aerobic fitness questions or concerns should consult their physician prior to in-water training. CSD is a Dive Rescue II training class, but due to the important nature of the training, students may attend without Dive Rescue I certification.

BE SURE TO BRING All students must bring: Pen and paper for note-taking and sketching. Diving students must provide their own equipment: Exposure suit adequate for swimming pool environment, scuba regulator: recently serviced and environmentally protected with alternate air source (i.e.: octopus, Air III, etc.), timing device, depth and submersible pressure gauges, BC with oral/power inflator, two tanks with current Hydro & VIP, mask, snorkel, fins, weight system and two cutting tools (knife, wire cutters, or trauma shears) swim suit, exposure suit, and goggles. Recreational / Sport diving equipment is suggested.

Current Diving

instructs team members about the intersection of swiftwater and dive rescue equipment and techniques. By learning to use specialized equipment and proven search techniques, your team will be prepared to safely complete complex, challenging, and potentially dangerous current diving operations. You will learn anchoring and high line techniques to better prepare your team for various incident scenarios. All of Dive Rescue International's diving courses are taught in a classroom, a pool, and an open-water site, allowing students to practice their new skills in a safe environment prior to the mandatory field scenario work.

TOPICS INCLUDE Hydrology/Dynamics of Moving Water • Scene Evaluation • Preplanning Current Diving Operations • Self-Rescue Techniques • Rescue Procedures for Surface Support Personnel • Selecting Specialized Equipment • Search Patterns in Current • Search Techniques • Handling Panic and Stress • Field Scenarios

PREREQUISITES All students must be a member of a public safety agency and at least 18 years of age. Students must also read and complete a RSTC Medical Statement prior to attending class. **Any diving answer yes to any contraindication must have the form signed by a physician.** All diving personnel must provide proof of Dive Rescue 1 certification. This program

is designed for personnel who are physically fit. Participants are encouraged to participate after successfully completing the IADRS Watermanship Test or testing to a fitness level of 13 MET (Metabolic Equivalents) or greater. Participants with aerobic fitness questions or concerns should consult their physician prior to in-water training.

BE SURE TO BRING US Coast Guard approved PFD with knife and whistle, adequate clothing and protection from the environment and pen and paper for note-taking and sketching. Diving students must provide their own equipment: Wetsuit or drysuit, scuba regulator: recently serviced and environmentally protected with alternate air source (i.e.: octopus, Air II, etc.), timing device, depth and submersible pressure gauge, BC with oral/power inflator, two tanks with current Hydro & VIP, mask, snorkel, fins, weight belt and two cutting tools (knife, wire cutters, or trauma shears).
