+1757 630 4960

**SINCE 1963**

## Set Screw

- There is a set screw on the back of the mount.
- It will hold the mount in place.
- It will still allow the mount to break away in an emergency.
- The HUD will still be attached to the mask with the provided lanyard.
- If you HUD breaks away and you are still entangled, you cut the lanyard away.
- **Life over Gear!**

# Placement and set screw Mount

As for the placement of the mount on the FFM it will depend on the the person. Before you tighten the set screw. The mount can be moved left and right until you get the best view of the HUD screen

Z fold excess
